Subject: MLPAComments: Support for Package 2

To Whom It May Concern,

As a retired diver and concerned citizen, I cannot stress enough the importance of supporting preservation of as much of the northern and central coast of California. Beyond the needs of the fishing industry, this area of coast is unique in this country and perhaps the world, for its wealth of variety of sea mammals and fishes as well as natural beauty. That it is capable of supporting the variety of sea life alone should give a reasonable person pause before taking any action to lessen the very essence of that place.

Please support Package 2.

Thank you,

Roger Fish
